---

Business and data analyst with an MSc in Business Analytics from Bayes Business School and three years of analytical and operational experience across recruitment, IoT and university finance. I work in SQL, Python and Power BI. My strongest work has been reconstructing datasets other people had stopped reconciling — including a nine-year emissions series where I published the gap I could not explain rather than drop the year that caused it.

## SKILLS

**Data** SQL (joins, CTEs, window functions) · Python (pandas, NumPy, scikit-learn) · Excel (Power Query, pivot tables)

**Reporting** Power BI (DAX, data modelling) · Tableau · KPI design · Dashboard automation

**Practice** Data reconciliation and cleaning · Cohort analysis · Requirements gathering · Stakeholder reporting

## EXPERIENCE

### Accounts Payable Officer

Middlesex University — London, UK | April 2026 – Present

- Process and validate high-volume supplier invoices through the Purchase-to-Pay workflow, ensuring accurate coding, matching and system reconciliation.
- Reconcile supplier statements against internal ledger balances monthly, and clear payment holds by investigating mismatches between purchase orders, goods receipts and invoices.
- Review monthly reports for coding errors and anomalies, supporting month-end accuracy and audit compliance.

### Student Data Operations & Academic Support (Unitemps)

City St George's, University of London | August 2025 – April 2026

- Supported high-volume student registration and ID production across two intake periods, verifying student data across university systems.
- Provided structured academic note-taking for postgraduate lectures, synthesising complex material into accessible documentation for students with learning accommodations.
- Invigilated 20+ examination sessions and supported major university events, including graduation ceremonies.

### Data Analyst (Contract)

Rauha — London, UK | November 2024 – December 2024

- Structured and cleaned 10,000+ IoT sensor records in Python, resolving anomalies to make the dataset usable for modelling.
- Built Power BI dashboards for internal operational reporting, presenting findings directly to the CEO and CTO.

### Talent Acquisition Specialist & Junior Data Analyst

Enhanceer — Ahmedabad, India | September 2023 – August 2024

- Analysed recruitment funnel and cohort data to locate drop-off points, reducing average time-to-hire from 30 days to 20 days.
- Automated KPI reporting in SQL and Power BI (DAX), cutting the weekly reporting cycle from four hours to fifteen minutes.
- Built Power Query ETL workflows that removed roughly eight hours of manual data processing per week.

### Technical Recruiter & Data Operations Analyst

SolutionTech HR — Gurugram, India | July 2021 – August 2023

- Maintained the data behind 200+ hiring campaigns for SaaS and PaaS clients on ATS platforms (Workable, Greenhouse).
- Built Excel and Power BI reporting that gave client stakeholders visibility into pipeline performance.

## SELECTED PROJECTS

### Nine-year emissions reconstruction — Equinor MSc, Bayes Business School

Rebuilt nine years of reported emissions from source data to test a stated relationship. Eight of the nine years reconciled; the ninth left a 1.5 Mt residual I could not account for. I published it as a labelled row in the reconciliation table rather than dropping the year, and set out what that unexplained gap obliged the conclusions to be.

### Pension scheme decision tool — USS MSc, Bayes Business School

Group research project on member understanding of the USS scheme. My contribution was reframing the brief: the question was not how to explain the scheme better, but what a member was actually trying to decide. The prototype was rebuilt around that question.

## EDUCATION

**MSc Business Analytics — Merit** Bayes Business School, City St George's, University of London | 2024 – 2025

**MBA, Human Resources & Finance** Kurukshetra University, India | 2019 – 2021

**BBA, Business Administration** Kurukshetra University, India | 2016 – 2019

## OTHER

**Awards** All India Rank 35, Commerce Talent Search Examination · Co-President, Bayes Business Analytics Society (2024 – 2025)

**Certifications** Microsoft Power BI Data Analyst · Data Visualisation with Python · Advanced Excel Analytics
