Sahil Kumar

Data & Business Analyst | Python, SQL, Power BI | MSc Business
Analytics | MBA
London Area, United Kingdom

Summary

Bridging the gap between complex data and business strategy. I am a Business & Data Analyst with a dual foundation in an MSc in Business Analytics (Bayes Business School) and an MBA in HR. I specialise in transforming raw datasets into automated insights that drive efficiency, operational improvement, and ROI. My work combines statistical modelling, business analysis, and an understanding of organisational processes. Whether optimising recruitment funnels or developing predictive machine learning models, my focus is on delivering measurable business impact. Key impact includes:

- Automated reporting workflows, saving 8+ hours per week in manual processing
- Improved recruitment efficiency by 20–30% through custom Power BI dashboards
- Cleaned and validated 10,000+ data points, increasing ML pipeline efficiency by 35%
- Delivered a live predictive modelling project for the UK Department for Transport, focused on trade and logistics data

My technical toolkit includes Python, SQL, R, Power BI, Tableau, and Excel (Power Query), with hands-on experience in predictive analytics, data modelling, people analytics, workforce planning, and stakeholder reporting. I am actively seeking Business Analyst, Data Analyst, or People Analytics roles where data is used to solve complex, high-impact business problems.

Experience

Middlesex University
Accounts Payable & Financial Data Analyst
April 2026 - Present (4 months)
London Area, United Kingdom

> Process and validate high-volume supplier invoices while ensuring accurate financial data entry, coding, and system reconciliation within the university finance system.

- > Analyse invoice, supplier, and purchase order data within the Purchase-to-Pay (P2P) workflow to identify discrepancies and maintain financial data integrity.
- > Investigate and resolve supplier payment and transaction discrepancies, collaborating with internal departments to ensure accurate financial records.
- > Support invoice matching, reconciliation, and financial data verification, improving accuracy across procurement and payment records.
- > Ensure compliance with university financial policies, audit requirements, and internal controls while maintaining accurate documentation and reporting.

City St George's, University of London
 Student Data Operations & Academic Support (Unitemps)
 August 2025 - April 2026 (9 months)
 Greater London

- ✓ Supported high-volume student registration and ID card production operations, ensuring accurate capture and verification of student data across university systems.
- ✓ Provided structured academic note-taking for postgraduate lectures, synthesising complex lecture content into clear, accessible documentation for students with learning accommodations.
- ✓ Assisted student services teams with data handling and administrative coordination, maintaining accurate records and supporting smooth operational workflows.
- ✓ Contributed to major university events and student engagement initiatives (careers fairs, inductions, campus activities), coordinating logistics and supporting student-facing operations.

Bayes Business School

1 year 1 month

President (Bayes Business Analytics Society)
 September 2024 - September 2025 (1 year 1 month)
